Introduction

This document contains the release notes for Cyberoam NetGenie HOME (100063E-20130905-NG11EH and 1000645-20130924-NG11EH) and SOHO (200063E-20130905-NG11EO and 2000645-20130924-NG11EO) appliances.

This release comes with new features and several bug fixes to improve quality, reliability and performance.

Features

1. 4G -LTE Support

With this version, NetGenie supports Internet connectivity through 4G-LTE modem. A 4G system provides wireless Internet access to the user through mobile phone towers.

To configure 4G-LTE settings in NetGenie, go to **Network Settings > Internet**.

Please note that this is a Beta feature release.

2. Road Warrior VPN

With this version, NetGenie supports configuration of Road Warrior VPN in NetGenie.

Road Warriors are the people who travel most of the time and often require connecting to office network. This feature enables travelling employees of an organization connecting to organization's network through VPN.

Prior to this version, the administrator was allowed to establish site-to-site VPN connection to ensure remote and branch office connectivity.

To configure Road Warrior VPN in NetGenie go to **Network Settings > VPN IPsec**.

Please refer to kb.netgenie.net for configuration details.

Behavior Change

With this version, a NetGenie appliance behind any NATed device will update DynDNS with public IP address instead of a private IP address.

Bug Solved

Bug ID – NG-2200

Description – While applying Internet access configuration for connection type USB modem, the init string goes blank.

Bug ID – NG-2815

Description – Tata Photon USB modem does not work after rebooting.

Bug ID – NG-1458

Description – NetGenie does not try to reconnect to NTP server after first failed attempt.

Bug ID – NG-2941

Description – NetGenie appliance frequently restarts when it is connected to the Internet using USB modem or when number of machines connected to NetGenie appliance goes beyond 8 (eight).

General Information

Technical Assistance

If you have problems with your system, contact customer support at

- support@netgenie.net
- +91-937-781-8181
- +91-79-3981-8181

Please have the following information available prior to contacting support. This helps to ensure that our support staff can best assist you in resolving problems:

- Appliance Serial number
- Firmware version
- Description of the problem, including the situation where the problem occurs and its impact on your operation
- Detailed steps on the methods you have used to reproduce the problem
